

KÖCO Stud Welding Gun

CLASSIC SK14-short

The stud welding gun CLASSIC SK 14-short is the compact version of the well-established CLASSIC SK14.

Being a modern and performant tool for the drawn arc stud welding, the CLASSIC SK 14-short is the perfect solution for working in restricted space conditions.

It is designed for comfortable operation and known for its sturdiness and reliability.

Besides stud welding with ceramic ferrule, it is also suitable for short cycle and inert gas stud welding.

The precision technology of KÖCO stud welding guns ensures repeatability and produces first-class welding results, even under difficult operating conditions.

It fits perfectly to the KÖCO compact stud welding equipment ELOTOP 502, ELOTOP 802 and INVERTER 905i.

Stud Welding Gun CLASSIC SK14-short

CLASSIC SK14-short

Technical data	SK 14-short
Stud welding with ceramic ferrule Weldable stud range \varnothing (mm)	4 - 12
Short cycle stud welding Weldable stud range \varnothing (mm)	3 - 12
Stud welding with shielding gas Weldable stud range \varnothing (mm)	3 - 12
Standard support with ... legs	2
Lifting range from ... to ... (mm)	1 - 4,5
Input voltage lifting coil (V=)	60 - 90
Welding cable (m/mm ²)	5/35
Welding cable plug (mm ²)	35
Control cable (m/mm ²)	5/4x1,0
Control cable plug (4 wire)	●
Body: fibre-glass reinforced polyamide (black)	●
Length (excluding chuck) (mm)	140
Body \varnothing approx. (mm)	50
Height (including handle) (mm)	155
Weight excluding cables app. (kg)	0,9

● = standard, ○ = optional
